PROFESSIONAL SUMMARY Undergraduate student in Informatics Engineering (D3) specializing in Software Engineering and Backend Development. Strong foundation in Object-Oriented Programming (OOP), relational database architecture (SQL), and RESTful API design. Experienced in developing modular, scalable applications using MVC frameworks and modern containerization tools (Docker). Highly adaptable with strong analytical thinking, eager to tackle complex business problems and learn modern distributed system technologies.

EDUCATION Universitas Sebelas Maret (UNS) - Surakarta, Indonesia Diploma 3 (D3) in Informatics Engineering | 2024 - Present

SMK Muhammadiyah 1 Sukoharjo - Surakarta, Indonesia Software Engineering (Rekayasa Perangkat Lunak) | 2021 - 2024

SOFTWARE ENGINEERING PROJECTS

Bank Sampah System (PT. Biptek - Project-Based Learning) | [github.com/amandanmira/PBL-BankSampah]

- Engineered the backend system for an integrated waste management platform applying strict Object-Oriented Programming (OOP) principles.
- Designed and normalized relational database architecture (SQL) to ensure data integrity for user transactions and waste categorization.
- Built, documented, and tested secure RESTful APIs using Postman to handle complex business logic and user role management.
- Collaborated with cross-functional teams using Git/GitHub for version control to ensure best coding practices.

Geprek GT Platform (E-commerce Development) | [github.com/raditya-hafid/trymanpro]

- Built a scalable e-commerce platform and digital menu catalog using MVC architecture.
- Implemented core business logic for order processing and handled seamless SQL database integration.

Zenith (Marketplace Application) | [github.com/sirius-leaf/ZenithNew2]

- Developed a comprehensive electronic products marketplace application to facilitate user-to-user transactions and product cataloging.

ORGANIZATIONAL & LEADERSHIP EXPERIENCE

Student Association (E-mailkomp) - Universitas Sebelas Maret Head of Social Community Division | February 2026 - Present

- Drive initiatives with big impact by leading social community outreach programs and coordinating cross-organizational collaborations.

SMART IT FESTIVAL 2025 - Surakarta City Hall Committee Member & Certified Participant | 2025

TECHNICAL SKILLS

- Programming Languages: PHP (OOP), JavaScript, Dart, SQL.
- Architecture & Concepts: RESTful API Design, MVC Architecture, Database Normalization, Software Design.
- Frameworks & Libraries: Laravel, React.js, Vue.js, Flutter, Tailwind CSS.
- Infrastructure & Tools: Docker, WSL, Git/GitHub, Postman, Railway, Netlify.

CERTIFICATIONS

- Building Web Applications with React - Dicoding | [[Show Credential](#)]
- Basic JavaScript Programming - Dicoding | [[Show Credential](#)]
- Candidate & Digital Skills Badge - ISC2 (2026) | [[Show Credential](#)]
